Domestic Chip Technologies of the Future Will Emerge in Our Country

TEKNOFEST, the world's largest Aerospace and Technology Festival, is organizing the **"Chip Design Competition"** for the third time in its 7th year. The Chip Design Competition, which hundreds of young people apply yearly, aims to increase students' interest in micro-electronic technologies and improve their capabilities in this field. Organized by **TÜBİTAK** and **YONGATEK**, the competition is open to associate, undergraduate and graduate students individually or in teams of up to 5 people.

An Important Step in the Domestic and National Technology Initiative

Within the scope of the Chip Design Competition, which is organized under three separate categories: Analog Design, Digital Processor Design and Microcontroller Design, teams are expected to submit two reports, a preliminary design report and a detailed design report, a project demo to introduce their projects and a final presentation. The competition also paves the way for the domestic chip technologies of the future to emerge from our country on the path of **#NationalTechnologyInitiative**.

In the competition, where applications continue until **20 February 2024**, **150,000 TL** will be awarded to **the winners** of all three categories, **120,000 TL** to **the runners-up**, and **100,000 TL** to **the third**.

Note to the Editor: TEKNOFEST Technology Competitions 2024

The world's largest technology competitions organized within the scope of TEKNOFEST Aerospace and Technology Festival provide 30 million TL in prizes and over 55 million TL in material support to technology enthusiasts who will exhibit high performance in prestigious competitions with the motto "You are the Future with TEKNOFEST". TEKNOFEST technology competitions, which are the largest award-winning technology competitions in Türkiye's history, are organized in 46 main categories and 117 sub-categories this year, with more competition categories opened each year than the previous year. Within the scope of TEKNOFEST 2024, Wireless Communication, Block Chain, Air Defense Systems, Financial Technologies, Unmanned Naval Vehicles, Smart Wi-Fi Coverage and TEKNOFEST Robolig Competitions are being opened for application for the first time this year.

TEKNOFEST Aerospace, Space and Technology Festival 2024 will be held in Adana under the main leadership of the Turkish Technology Team Foundation (T3 Foundation) and the Ministry of Industry and Technology, with the support of Türkiye's leading technology companies, public organizations, media organizations and universities. The deadline for TEKNOFEST 2024 technology competitions is 20 February 2024.
